

MUA Registration number (assigned by IBC): []

Certification statement:

- I. The information below is accurate and complete. I am familiar with and agree to abide by the relevant provisions of the current NIH GUIDELINES FOR RESEARCH INVOLVING RECOMBINANT DNA MOLECULES (NIH GUIDELINES) [http://oba.od.nih.gov/rdna/nih_guidelines_oba.html], as of 10/07/09] and other specific instructions from NIH and the IBC pertaining to this project. I agree to comply with the NIH requirements pertaining to shipment and transfer of recombinant DNA material.
- II. I certify that the Institutional Biosafety Committee of the University of Detroit Mercy has reviewed this MUA and the project and has found the described research and procedures compliant with the current NIH Guidelines and that the IBC.
- III. I certify that I will be responsible to train researcher with the containment procedures described by the NIH Guidelines. I will monitor the activities of researchers to ensure that their activities are compliant with NIH Guidelines.

Signature: _____

Date: _____

- IV. Locations: Give the names of the buildings and room numbers of all facilities that will be used in the described activities.

Building(s)

Room number(s)

- V: Personnel: Give the full name, title, contact information of all personnel engaged in the described experimentation.

Full name

Title

Contact information

VI. Description of the experiments:

A. Give a brief (~one page) description of the project and the experiments in non-technical language. This is to help the IBC members and other non-specialist understand the nature of the project and its significance.

B. For each recombinant DNA experiment (1, 2, 3, . . .), describe:

(a) the source(s) of the DNA (b) the nature of the inserted sequences (c) the host(s) and vector(s) to be used. Provide sufficient detail
